How the Claude Malaysia AI News bot posts to Instagram automatically

One GitHub Actions workflow → a 10-slide news carousel on Instagram every day, with no one touching it.

⏰ TRIGGER

1 🗓️

GitHub Actions

`ai-news-carousel.yml`

Runs daily at **11:00 AM MYT** (03:00 UTC), or manually with a **dry-run** switch that builds slides without posting.

📰 FIND & WRITE

2 ✅

Preflight

`poster.validate_account`

Checks Blotato can see the IG account before spending any AI credits.

3 🔎

Scrape news

`scraper.py`

Google News searches + Tech in Asia & e27 feeds for Malaysian AI stories.

4 🧠

Claude picks & writes

`selector.py`

Skips stories in `posted_urls.json`, picks one, writes **10 slides + caption**. Fact check on dates.

🎨 DESIGN

5 🖼️

Photos

`image_gen.py`

Article image + Pexels photos per slide, never reusing a photo.

6 🖌️

Render slides

`builder.py · Playwright`

Turns slides into PNGs with the logo. Quality gate: stops if >2 slides lack a photo.

📤 PUBLISH & REMEMBER

7 📱

Post to Instagram

`poster.py · Blotato API`

Uploads the carousel + caption to **@claude malaysia community**

8 💾

Remember

`posted_urls.json`

Logged and committed back to the repo so a story is never repeated. Slides kept 7 days as artifacts.

🧰 What you need to copy it

FREE **GitHub** — hosts the code and runs it on schedule

PAY PER USE **Anthropic API key** — `ANTHROPIC_API_KEY`, Claude writes the posts

PAID **Blotato** — connects your IG, gives `BLOTATO_API_KEY` + account id

FREE **Pexels API key** — `PEXELS_API_KEY` for photos

✏️ What you change

- `config.json`: Blotato account id & username
- Brand name, handle, hashtags
- News searches & feeds
- Your logo
- Schedule (`cron` in the workflow)

🛡️ Built-in safety

- Dry run before going live
- Skips if it posted <7 h ago
- One run at a time, no double posts
- Keys live in GitHub Secrets

Python 3.11 · GitHub Actions · Claude · Pexels · Playwright · Blotato
